1. Introduction

This class deals with entrepreneurial processes such as embodying new idea, recognizing opportunity and potential market, business planning, financing, building powerful entrepreneurial team, the growth of entrepreneurial company, and other issues related to entrepreneurial process. In specific, we focus on teaching primary concepts and tools necessary to understand entrepreneurial process and then on writing a business plan. A concise, well-written business plan is the best way to communicate with customers, investors, and other stakeholders in question. To increase the efficiency of this class, students are required to read assigned book chapters and sub-materials, analyze cases, actively participate in class discussion as an individual or a team, and do a semester-long project (i.e., writing a business plan). To additionally increase indirect hands-on knowledge about entrepreneurial process, we will invite guest speakers who already made a big success.

2. Course Objectives

3. Class types and activities

This class uses various teaching methods such as lecture, case analysis, discussion, and team project presentation. For high performance in class: First, come to class prepared. Come prepared having read assigned chapters and cases. Tips for the preparation: Please, think about what these mean to you and your entrepreneurial companies. With respect to the preparation of cases, come with your own answers to the fundamental questions asked at the end of each Reading Chapter or CASE. Second, take risks in class discussion, given that your class participation contributes to the quality of this class. Don't be afraid to disagree with your classmates, our guest speakers, or even with me. Last, 'Be clear and direct in communicating your written and oral work.' A concise, well-written assignment and a clear presentation are the best way to transfer your work to the stakeholders, as well as your classmates. Folks, why not be entrepreneurial in this class!!!

Although voluntary participation is strongly recommended, for effective class participation, you will be randomly 'cold called' in class under the assumption that you are prepared. If you think you are extremely shy, it is recommended to use 'promised call' system. Namely, if you want to be called in class, please email me at least one day before the expected class. Your participation grade will be, whether voluntary or cold call, graded on the basis of the quality of your comments. Being not prepared will count against your participation grade. Being 'Wrong' will not hurt your grade but will also not help out.

This class also asks you to make a team for the term project. Each team is supposed to do two primary things: a) CASE analysis and presentation and b) Term Project Presentation (i.e., Writing Business Plan). Based on performance of each area, your team will be graded. Please refer to the following grading criteria for each item.

4. Teaching Method

- | | |
|---|---|
| <input checked="" type="checkbox"/> lecture | <input checked="" type="checkbox"/> discussion and debate |
| <input checked="" type="checkbox"/> team project(presentation and case studies) | <input type="checkbox"/> experiments(role-playing,etc) |
