1. Course Introduction

This is an introductory course in corporate financial management. Students will become familiar with the various concepts and tools used to manage financial management issues within a framework of the “law of one price”. Topics will include, but will not necessarily be limited to, interest rates and the time value of money, valuing projects and firms, risk and return, and capital structure.

2. Course Objectives & course outcome

3. Class types and activities

Classes will be held online and realtime via Zoom.

Homework and assignments will be posted on Ajou Bb and/or through email.

There will be homework at the end of each chapter. The answers will not be graded, but submission will be counted toward your final grade.

There will be 2 assignments during the semester, in which you will handle real financial data.
